A multi-disciplinary program

Supporting professionals include

• Archivists
• Special Collections librarians
• Systems librarians and programmers

Benefits

• Very interesting work!

Challenges

• Different professions use different vocabularies
Building and extending a search system

Evaluation and selection of an Encoded Archival Description (EAD) search solution performed in mid-2003

- Needed functionality: search and retrieval of XML documents
- Lack of market options for EAD-specific searching
- Limits on available open source solutions
- A final, key need: Application creation and extension

Selected union catalog solution: IXIASOFT TEXTML native XML database

Global Warming...
"green" buildings and a Seattle Energy Code, air and water quality issues, and **global warming**. Sponsored by Wills and passed in 2000, Resolution 30230 supported removal of four lower Snake River dams and generated an immense amount of correspondence from other cities in the state that were opposed to the idea.

What is RSS?

RSS is a Web content syndication format.

Its name is an acronym for Really Simple Syndication.

RSS is a dialect of XML. All RSS files must conform to the XML 1.0 specification, as published on the World Wide Web Consortium (W3C) website.

Guide to the Elizabeth Curtis French Papers

Monday, February 11, 2008, 1:25:25 PM

Elizabeth Curtis French, M.D. was born in Picabo, Idaho in 1907. She enrolled as a pre-med student at the University of Idaho and continued her studies at the University of Oregon Medical School in Portland, Oregon. She graduated in 1931 at the age of 23, one of four women medical students in a class of 75. She returned to Idaho, setting up practice as a general practitioner in Weiser. She continued to practice until the age of 81. In 1989, she reluctantly gave up her practice.

Guide to the Oregon Dietetics Internship Program Collection

Monday, February 04, 2008, 11:06:53 AM

Dietitians were one of the earliest health professions trained at the University of Oregon Medical School located on Marquam Hill in Portland, Oregon. The student dietitian training program began in 1930-31. Under the auspices of the Oregon Dietetic Association, the program was sponsored by Portland area hospitals including Multnomah County Hospital and Doernbecher Memorial Hospital for Children. The program is the oldest on the West Coast and has graduated some 725 dietitians in its 75 year history. The program remains the primary supplier of Registered Dietitians for Oregon and the Northwest.

Overview

The Sitemap Protocol allows you to inform search engines about URLs on your websites that are available for crawling. In its simplest form, a Sitemap that uses the Sitemap Protocol is an XML file that lists URLs for a site. The protocol was written to be highly scalable so it can accommodate sites of any size. It also enables webmasters to include additional information about each URL (when it was last updated; how often it changes; how important it is in relation to other URLs in the site) so that search engines can more intelligently crawl the site.

Sitemaps are particularly beneficial when users can't reach all areas of a website through a browseable interface. (Generally, this is when users are unable to reach certain pages or regions of a site by following links). For example, any site where certain pages are only accessible via a search form would benefit from creating a Sitemap and submitting it to search engines.

This document describes the formats for Sitemap files and also explains where you should post your Sitemap files so that search engines can retrieve them.

Please note that the Sitemap Protocol supplements, but does not replace, the crawl-based mechanisms that search engines already use to discover URLs. By submitting a Sitemap (or Sitemaps) to a search engine, you will help that engine's crawlers to do a better job of crawling your site.

Using this protocol does not guarantee that your webpages will be included in search indexes. (Note that using this protocol will not influence the way your pages are ranked by Google.)

Google adheres to Sitemap Protocol 0.9 as dictated by sitemaps.org. Sitemaps created for Google using Sitemap Protocol 0.9 are therefore compatible with other search engines that adopt the standards of sitemaps.org

XML Sitemap Format

The Sitemap Protocol format consists of XML tags. All data values in a Sitemap must be entity-escaped. The file itself must be UTF-8 encoded.

Overview of the Collection

Title: 19th Century Actors Carte de Visite Collection

Dates: 1860-1885 (inclusive)

Quantity: 605 photographic prints on carte de visite mounts 4 x 2 1/2 in.

Location of Collection: KV961

Collection Number: 75

Summary: Carte de visite photographs of nineteenth-century actors.

Repository: University of Washington Libraries Special Collections

Languages: Collection materials are in English.

Sponsor: Funding for encoding this finding aid was partially provided through a grant awarded by the
Performers: Booth Family

The Booth family was strongly identified with the nineteenth-century American theater scene; there was no greater name among American actors at that time. Junius Brutus Booth, Sr., immigrated to the United States from England in 1821 and established the Booth name upon the American stage. He left his legacy to be carried by sons Edwin, John Wilkes, and Junius Brutus, Jr.

Why this effort is important...

“[Research] libraries and their institutions will increasingly be distinguished by the special collections of rare and unique materials which they hold and by the scholarly services they provide for these materials.”

Donald Waters, ARL (October 2005)
